Art Unit: 1625

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Li et al, Chinese patent 1122806A. At p. 7, lines 8-13 it discloses the synthesis of

Which is compound 31. See its properties at p. 14. The compound is made by reacting artemisinin acetic ester (compound V) with fluorouracil as shown at p. 7, lines 8-13.

The compounds have antiparasitic properties and are used to treat malaria.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al, supra. The above adverted to specific compound taught by the reference renders obvious the compounds and pharmaceutical compositions and methods where R7 represents a bond attached as a substituent to R1 together with the group –N-X(=Z)- forming an optionally substituted group. Applicants should cancel this embodiment from the claims.

Art Unit: 1625

Claims 2-8 and 14-16 are objected to as being dependent upon a rejected base claim. They would be allowable if claim 1 were rewritten to impart patentability
